It's a Chain Reaction!

This week 4th graders designed, built, and tested chain reaction machines that displayed a message at the end. The chain reaction machine used multiple components that transfer energy from one part to the next!

Are you interested in supporting your own and other young athletes at LCS?

The Lamoine Rec Dept. meets the first Thursday evening of each month in the LCS teachers room. The group is not looking for someone who has the ability to give their arms or legs to the cause (who does have that kind of time??), but rather ANYONE at ANY meeting or time that can help support our youth athletes. Meetings are open to anyone, are usually short, and often the agendas consist of logistics in supporting the current sports program. Great recreational programs are built through many hands pitching in - right now our group is very small and we would really like to increase our capacity. If you are willing to donate even a small percentage of time or effort to support the next wave of LCS Lion Athletes, please contact rec@lamoine-me.gov. Our next meeting is November 1 at 6:30 PM. We hope to see you there!!

3rd grade Instrument Makers!

3rd graders designed a handmade instrument, made a plan, completed a materials list and began construction this week!

There has been some beautiful music filling the hallway.

This Week's Lion Pride.....

Abby Martens, Lacey Trenholm, Jackson Wade Rudy, Piper Smith, Dillon Stillwell, & Rylee Goller!
